

## LUBRITA CUTTING OIL MFE SUPER SOLUBLE OIL

**High End Mineral Based Soluble Cutting Oil** 

## **DESCRIPTION**

**LUBRITA CUTTING OIL MFE SUPER is** water emulsifiable oils for metal working operations where better rust protection, long oil life & maximum cooling is desired. These oils are developed with selected base oils, emulsifiers and biocides for ready mixing to form a stable emulsion which provide good rust protection and excellent cooling.

**LUBRITA CUTTING OIL MFE SUPER** is recommended for turning, milling, CNC, VMC, Grinding and other light to medium general machining operations in ferrous and non-ferrous metals. LUBRITA CUTTING OIL MFE SUPER is not recommended for Magnesium machining. **Performance Standards:** Meet IS: 1115-1986 standards. **BENEFITS** 

- Form stable emulsions with water upto even 400 ppm hardness.
- Permit rapid separation of chips and grinding dirt keeping circulating line clean.
- Provide excellent protection against rusting.
- Provide effective cooling.
- Formulated for components with high resistance to bacterial attack and protected from bacterial degradation.
- Free from Nitrites, Phenol, Rosin & chlorinated additives

| Typical Data                              | Concentration in % |
|---|--------------------|
| Grinding                                  | 2-5%               |
| General Machining( Turning, Drilling etc) | 4-6%               |
| Difficult operation or machining          | 6-8%               |
