

PRODUCT DATA SHEET

INTERNATIONAL ANTI-RUST 152-L2

DESCRIPTION

International Anti-Rust #152-L2 is a very thin film, rust preventative formulated with a low odor, slow evaporating safety solvent. A Barium Free Rust Preventative designed to meet today's safety requirements. Anti-Rust 152-L2 provides a thin colorless film as well as creating a highly protective coating that has water displacing ability.

International Anti-Rust 152-L2 comes from International Chemical Company, USA with more than hundred years of experience in formulating products for metal working industry including rust preventatives. The products are formulated for maximum performance by highly skilled chemists, following highest standards and guidelines for safety. ICC Rust inhibitors carry endorsements from major global automobile, auto component and other engineering product manufacturing companies.

FEATURES AND BENEFITS

- Efficient Indoor Rust Protection
- Extremely Thin Dry Film
- Low Viscosity enables maximum coverage of parts per litre of product
- Barium Free formulation ensures compliance with international regulations
- Displaces Water from Wet Parts
- Easily Removed with Aqueous Detergents or Mineral Spirits

TYPICAL CHARACTERISTICS

Property	Test Method	Value
Specific Gravity @ 15°C	ASTM D 4052	0.79
Flash Point, COC min	ASTM D 92	40 °C
Kinematic Viscosity @ 40 °C	ASTM D 445	1.1cSt
Humidity Chamber Test	ASTM D 1748	340 hours
Coverage		40 to 60 sqmtr/litre

PROTECTION PERIOD

- Indoor - 3 months
- Indoor (Packed) - 9 months

APPLICATION

Can be applied by Dipping, Spraying or Brushing.

REMOVAL

Can be removed by Alkaline or Solvent Degreasers.

USAGE AREAS

International Anti-Rust 152-L2, can be used as protection of machined parts during In – Process and post process for short to medium term preservation.

PDS IAR 152-L2

Doc No. ICC/PDS/01/01

05- 2011
