

PRODUCT DATA SHEET

VORSTAB

Vorstab VorRust RP DW 175 (Rust Preventive- Solvent based)

Product Description:

Vorstab VorRust RP DW-175 is blended with petroleum base film forming materials and rust inhibitors film forming ingredients and having excellent de-watering properties. VORSTAB VORRUST RP DW 175 is fortified with water displacing additives, which removes all traces of moisture on the surface of components being coated are displaced by a protective film. It is specially designed to provide medium – term protection of components and machined surface.

Application:

Vorstab VorRust RP DW 175 is recommended for medium- term protection of ferrous metals and non-ferrous metals. Ideally suited for all in process application. It can be easily applied by dipping as per standards.

Product Benefits:

- Facilitates rapid removal of water or coolant from metal surface
- Forms effective & stable protective film against atmosphere
- Excellent coverage, can be applied by dipping as per standards.
- Non- Staining, Non -Tacky. Easy to remove.

Typical Data:

Characteristics	Typical Value
Appearance	Clear Thin Amber
Density	0.806
Flash Point	50 °C
Viscosity CST	2-3
Pour Point °C	-4 °C
Film thickness	4-6 microns
SST	Upto 24 hours (Max.)

Health and Safety:

Based on available information, this product is not expected to produce adverse effects on health when used for the intended application and the recommendations provided in the Material Safety Data Sheet (MSDS) are followed. MSDS is available upon request. This product should not be used for purposes other than its intended use. Take care to protect the environment when disposing after use.
